- 2008 The Last HOPE

MAME HACKING

The image shows a screenshot of the MAME emulator running the game Robotron: 2084. The game window displays a top-down view of the robot arena with several red robots and a player character. The score '100' is visible at the top. A debugger window is overlaid on the bottom right, showing the CPU register values and the instruction stream.

MAME: Robotron: 2084 (Solid Blue label) [robotron]

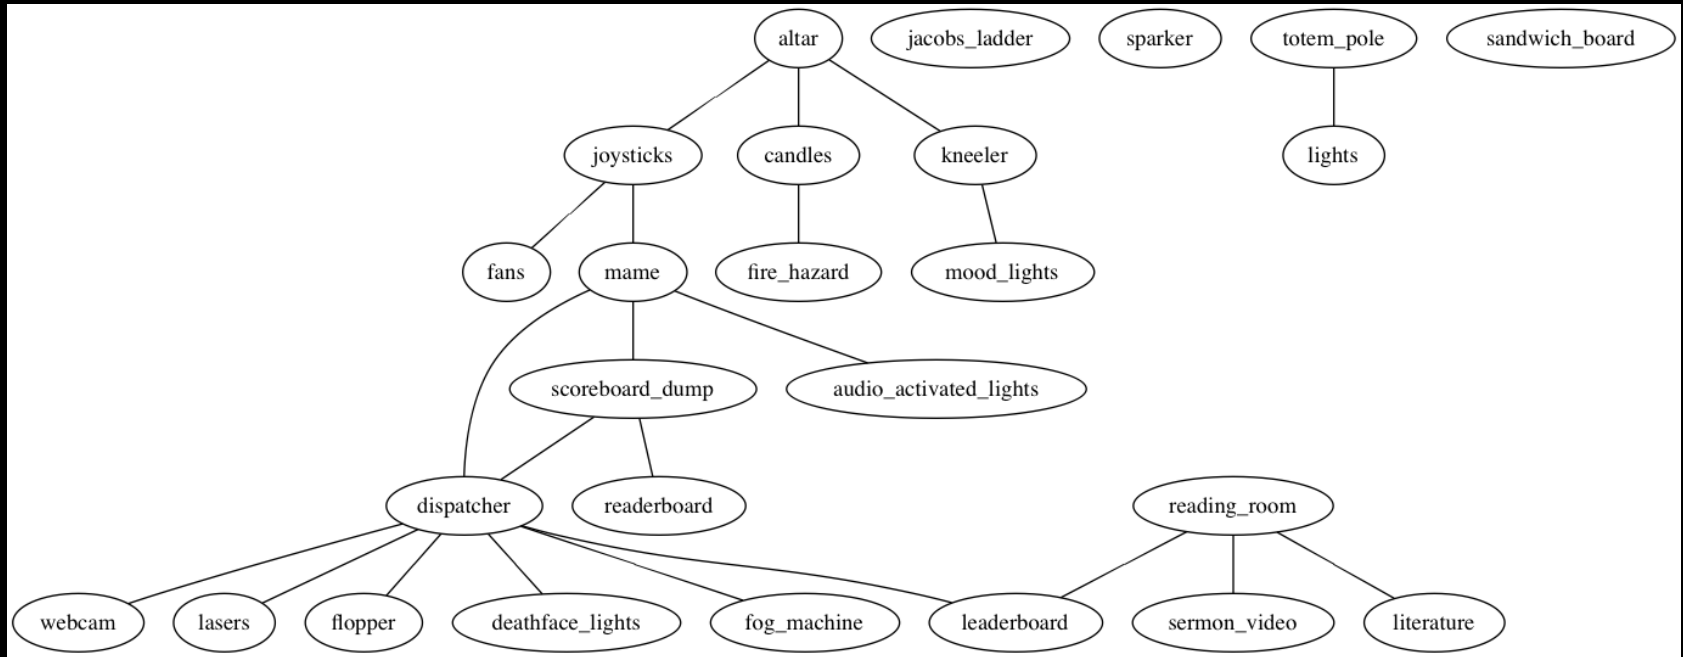

100

Debug: robotron - M6809 'maincpu'

Reception / Reaction

Toorcamp: The Church of Robotron

August 20, 2012 By [Eric Evenchick](#) - 4 Comments

"Only 72 years until the Robotrons conclude that the human race is inefficient and must be destroyed. Only the mutant produced by a genetic engineering accident can save us now!"
